CF-020400-69

Thermal Analysis

Oct 05, 2021

Ray Baruah, Guy Wagner
Electronic Cooling Solutions Inc.

Objectives

1. To determine that the critical components on the CF-020400-69 board are within their thermal limits for the following cases:
 - a) **23°C at sea level** (Initial assessment)
 - b) **-40°C at sea level**
 - c) **85°C at sea level**

At 2 different power levels:

- a) **Predicted** – Total Power of 302.7 W
- b) **Worst Case** – Total Power of 386.2 W

Approach

1. This analysis was done using FloTHERM XT V2021.1 CFD software.
2. The updated thermal model was created from the cf-020400-069m_asm file provided for thermal analysis.
3. The Falcon & PCB components were obtained from the PDML files provided.
4. It was assumed that no neighboring devices were producing or sinking heat.
5. The rear cover was assigned Al 6063 T5 as the material. Copper Plate over the Falcon with the rest of the housing as Al 6063 T5 was used as a second iteration to reduce temperatures further.
6. Two different thickness thermal gap pads have been used for the components : 0.040" & 1.00" , both of which have a thermal conductivity of 17.8 W/m-K.
7. Graphite pad attached to the Falcon top has a thermal conductivity of 20.0 W/mK in the Z axis and 1000 W/mK in the X-Y axes.
8. The critical components were modeled as 2-resistor networks with thermal resistance values found on the "Parts Thermal Characteristics.doc".

Thermal Model Setup

Thermal Model Setup – Overview

Enclosure Material – Copper as Plate over Falcon & Al6063 T5 as Rest of Housing & Rear Cover.

Thermal Data

CF-020400-54	Predicted			Worst Case			Thermal Resistance (°C/W)/Model	
Component	Qty	Per Component	Total	Qty	Per Component	Total	R _{JB}	R _{JC}
Falcon	1	259.8	259.8	1	324.8	324.8	0.95	0.022
LTM4700 Core_VDD	2	8.6	17.2	2	10.7	21.4	1.75	3.1
LTM4700 GOP_VDD	1	6.8	6.8	1	8.6	8.6	1.75	3.1

LT1963 CPU_1V8	1	0.2	0.2	1	0.3	0.3		
TPS51206 CPU_V_VTT	1	0.1	0.1	1	0.2	0.2		
MAXM17515 CPU_3V3	1	0.1	0.1	1	0.2	0.2	1.5	6
MAXM17515 CPU_VDDM1V5	1	0.1	0.1	1	0.1	0.1	1.5	6
		Total	302.7		Total	386.2		

Note: Thermal resistances from junction to case (R_{JC}) and from junction to board (R_{JB}) and thermal limits were taken from “Parts Thermal Characteristics”.

Note: For this set of simulations, the predicted power values were used.

Thermal Analysis

Results Summary – Comparison between Worst Case Power Temperature Cases

Design 2 – Copper Plate over Falcon, Al 6063 T5 Rest of Housing & Al 6063 T5 Rear Cover																		
Parameters				Sim 5			Sim 3			Sim 7			Sim 7			Sim 7
